

An AI that understands Africa from the inside.

NUURUZ AI answers in English, French, Portuguese and Arabic, grounded in African primary sources rather than treating the continent as a footnote to someone else's knowledge base.

OUR
LANGUAGE.
OUR AI.
OUR FUTURE.

1. PROBLEM

Many people and businesses across Africa struggle to access AI tools that reflect their languages, context, and practical daily needs. Existing solutions are often fragmented across multiple apps for research, writing, translation, voice, and productivity.

2. SOLUTION

NUURUZ AI brings AI conversation, multilingual assistance, research, voice interaction, and personal assistance into one integrated platform designed for African users and the global diaspora.

3. PRODUCT HIGHLIGHTS

AI Workspace

Interactive chat and research experience

Multilingual Support

English, French, Portuguese, and Arabic

NIA Assistant

personal AI assistant with memory controls

NUURUZ Language

long-term language innovation project

4. WHO IT SERVES

Students, entrepreneurs, startups, SMEs, professionals, and diaspora communities seeking accessible AI tools for learning, work, and business.

5. WHY IT MATTERS NOW

Growing AI adoption, increasing digital entrepreneurship, and demand for locally relevant technology create a strong opportunity for African-centred AI products.

6. BUSINESS MODEL / STAGE

Business Model:
Subscription

Stage:
Pre-MVP

7. VISION

Build African-centred technology that supports education, entrepreneurship, innovation, and economic opportunity while giving African knowledge, languages, and perspectives a stronger place in the global AI industry.
